We All Want More Play: So What’s Stopping Us?

Marc Armitage is an independent playworking consultant, specialising in the role of children’s play in learning and children’s social worlds. As an expert in his field, Marc regularly travels around the world lecturing, researching and consulting on the importance of the role of playing in learning.

This session looks at the most common barriers that settings face when trying to provide ‘more playing’ as part of their day. We will look at the barriers ... break them down ... rip them apart ... and explore a number of realistic solutions you can put into action now!

To see more about Marc go to - www.malarkeyon.com.au
